

# Presentation «Bunker-Palace»

Profil / Curriculum Vitae

**Bunker Palace** is a french-corean agency based in Paris Canal Saint-Martin that deals with spatial conception. It deals with the fields of architecture, design and constructive optimizations.

Our “Palace” side reflects our proper aesthetical choices, rigorous and technically ambitious.

Our “Bunker” side deals with our experimentative process of creation, which links trans-disciplinary references and an immersive attitude we consider necessary for our high expectations in terms of conception.

We are 3 associates with complementary fields of action and references in internationally reknown architectural and design agencies.
